

Main Menu:

- New Game – When you click on the “New Game” button you will be taken to the settings menu.
- Load Game – Currently when you click on the “Load Game” button nothing happens.
- Help - The rules on how Ricoet Robots will be displayed.

Settings:

- All settings must be selected before can start game.
- There are 4 types of color deficiency palette: Normal, Deuteranope, Protanope, Tritanope. This way the application is color blindness friendly.

Game Board:

- The “Hint” button currently has no functionality.
- To make a bid you need to select a player by clicking on “P1” or one of the other buttons. After clicking a text box will appear, in the text box you can enter a number. After entering a number, you can click “Place Bid” and the list below will be updated.
- When Game Menu is selected “Hint” has no functionality and “Manual” shows the instructions of the game. “Save Game” is still being debugged.
- Can now move the robot by clicking the direction keys. The robot does not stop at obstacles but does detect collisions.
